

ISAAC NEWTON; A DRAMATIC LECTURE A

Presentation by

HARRISON W. STRALEY, WHEATON COLLEGE

Isaac Newton is, perhaps, the greatest intellect and the most important person of the millennium. He was born while England convulsed in revolution, as Cromwell defeated the armies of King Charles I and The Treaty of Westphalia ended Europe's Thirty Years War. Newton lived shortly after Fermat, Galileo, Kepler and others had made significant discoveries in mathematics and science. He built upon their work. Isaac Newton appears in period costume to discuss his difficult childhood and turbulent life. This dramatic lecture, accompanied by slides, is designed to stimulate interest in mathematics and science through drama and mathematics/science history.

***Mathematics, Science, and History??? Are you intrigued?
Then, this is the talk for you!.***

WHERE? Hemenway Hall 212

WHEN? Monday, April 6, 2009, 8:00 – 9:00 PM
